For dust collection systems to work efficiently, they need to out draw the vacuum on the sander. Most sanders have about 240 cfm and edgers about 160 cfm. So minimum 400 cfm is needed. The system also needs to have enough hose to operate outside. Get the dust outside for the best results.

DUST CONTAINMENT

Why 220 Volts? Why up to 25 amps? We are trying to exceed the fan on the sander and the edger. This takes power.

For dust collection systems to work efficiently they need to out draw the vacuum on the sander. Most sanders have about 240 cfm and edgers about 160 cfm. So minimum 400 cfm is needed.

With optional adapter you can make one connection to a 50 amp breaker to run both the system and your sander!

CENO BUFFER
& UFO
UFOCC
\$2875

DO YOU WANT **DUST COLLECTION** AND AN **ORBITAL SANDER**?

Turns a regular buffer into a **FAST CUTTING**
RANDOM ORBITAL ACTION SANDER!

What is the UFO?

- 1) It's a 40 lb attachment that fits a regular buffer and can be easily removed for other screening processes allowing normal use of buffer. **BUFFER SHOULD BE 1 1/2 HP AT 160 - 175 RPM**
- 2) Makes a buffer cut 3 times or more **FASTER**. The orbital action adds weight so it cuts better but the geared orbital action cuts down on the scratches and swirl marks **AND INCREASES SANDING SPEED**.
- 3) It can cut fast enough to practically **REMOVE CHATTER!**
- 4) **PRODUCES A GREAT FINISH!** SAND using a drive pad & either standard screens or doublebacked sandpaper or sandpaper mounted on our special driver
- 5) **USES REGULAR SAND SCREENS!**
- 6) You are not carrying an extra piece of equipment! You have a buffer.
- 7) Buffer handles-turns like a normal buffer! You do not have to push it around.
- 8) **ADDS DUST COLLECTION** Connects to your vacuum with a 1 1/2" hose. Sands right up to the wall! **GREAT DUST PICKUP WITH INCLUDED SKIRT**

Built in slip clutch

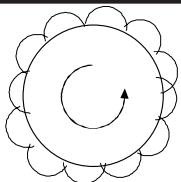

Dust enters through holes in brush driver, drawn through the housing, and out the dust pipe into your vacuum.

It picks up at the bottom edge of the pad.

(PIPE RESTS AGAINST BUFFER HOUSING AS PART OF GEAR DRIVE)

Note: UFO will not work unless either a dust pipe or special bracket is used!

BRUSH DRIVER (MIGHTY-LOK driver) IS BOLTED TO ATTACHMENT BUT CAN BE CHANGED EASILY. USES 15" THRU 17" DRIVERS. STANDARD 16" DRIVER

UNIQUE SANDING PATTERN
THAT IS TOTALLY DIFFERENT THAN
ANY OTHER ORBITAL STYLE SANDER

SCREEN TURNS AT 175 RPM WHILE
GEARED ACTION FORCES ORBITAL
MOVEMENT

SPECS

Aluminum housing 13.7" Dia 5" Tall

Having Finish problems?

When using oil based products we recommend that you use absco sealer available in quart containers. This is the old 550 voc formula. Use this first to seal the floor... It will dry quickly and allow the new 350 voc finish to flow and coat more easily. Still not drying fast enough use two coats of sealer and then one coat of 350 voc finish. The 350 finish is thicker than old formula finishes and will give similar protection if applied this way.

CAVpower

Safety. The EPA has classified certain species of wood dust as carcinogens. To ensure the continued health of everyone in the floor sanding business, dust containment is essential.

Time. Time spent hanging plastic or wiping down walls and counter tops can be avoided with the proper equipment. With CAV Power, traditional methods of dust control are unnecessary, which will allow the crew to finish the job quicker and move on to the next project.

Money. Customers will pay more for dust control. Market research has shown that the number one reason homeowners don't get their floors refinished is because they don't want their home covered in dust. When presented with a dust control option, homeowners will pay a premium for the service.
