### How do other systems compare?

#### Ask if other systems:

- Outdraw all sanders manufactured
- Increase dust pickup
- Contain dust from 16 and 24 grit sanding
- Have filters that do not clog

Outdraw any

coarse grits

Use with or

## DUST CONTAINMENT

For dust collection systems to work efficiently they need to out draw the vacuum on the sander. Most sanders output about 240 cfm and edgers about 160 cfm. So minimum 400 cfm is needed. This takes power and this is why we draw up to 26amps.

## HEPA FILTER

With included adapter you can make one connection to a 50 amp breaker to run both the system and your sander!

## Performance Matters

## GO DUSTLESS

Dust Skirt

*One orbital pad sands flatter, blends,  
and smooths more evenly.*

**Built in slip clutch**

## Excellent Dust Containment

Dust is picked up at the bottom edge of the pad through 36 holes.

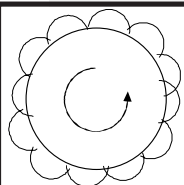

1 1/2" dust pipe vacuum connection and dust skirt included.

(DUST PIPE RESTS AGAINST BUFFER HOUSING AS PART OF GEAR DRIVE)

Note: UFO will not work unless the dust pipe is used! A hole will need drilled in buffer.

BRUSH DRIVER (MIGHTY- LOK driver) IS BOLTED TO  
ATTACHMENT AND CAN BE EASILY REPLACED.  
**STANDARD 16" DRIVER**

**ONLY HEAVY DUTY BUFFERS RECOMMENDED!**

PATTERN EACH ROTATION FOR A TRUE  
NONREPEATING ACTION.

Turns a regular buffer into a **FAST CUTTING  
RANDOM ORBITAL ACTION SANDER!**

## What is the UFO?

1) It's a 45 lb attachment that fits a regular buffer and can be easily removed for other screening processes allowing normal use of buffer. **BUFFER SHOULD BE RATED AT 1 1/2 HP AND 160 - 175 RPM**

2) Cuts 3 times or more **FASTER**. The orbital unit adds 50% more weight while the geared orbital action doubles the distance the abrasive travels increasing sanding speed while reducing scratches and swirl marks.

3) It can cut fast enough to practically **REMOVE CHATTER!**

4) **PRODUCES A GREAT FINISH!** SAND using either standard screens or sandpaper with our PSA hardplate.

5) **USES REGULAR SCREENS & ABRASIVES!**

6) You are not carrying an extra piece of equipment! You have a buffer.

7) Buffer handles-turns like a normal buffer! You do not have to push it around.

8) **ADDS DUST COLLECTION** Connects to your vacuum with a 1 1/2" hose. Sands right up to the wall! **GREAT DUST PICKUP WITH INCLUDED SKIRT**

**CHATTER** - You need a flat abrasive surface to cut off the top of the chatter and not the hollow. The best method uses sand paper on a hard surface and that is why we have developed a hard plate adapter for PSA-sticky discs.

**Blending** - Blending edger and sander marks together is easier. Sometimes there is a step created when sanding. This hump can be blended together typically using an 80 grit PSA disc.

**When using sandpaper with the UFO always remove center of paper!**  
**This allows the dust to stop building up and reduces scratches.**

### Having Finish problems?

When using oil based products we recommend that you use absco sealer available in quart containers. This is the old 550 voc formula. Use this first to seal the floor... It will dry quickly and allow the new 350 voc finish to flow and coat more easily. Still not drying fast enough use two coats of sealer and then one coat of 350 voc finish. The 350 finish is thicker than old formula finishes and will give similar protection if applied this way.
