Dust Skirt

GET **DUST Containment** AND AN **ORBITAL SANDER**

Turns a regular buffer into a **FAST CUTTING
RANDOM ORBITAL ACTION SANDER!**

What is the UFO?

- 1) It's a 45 lb attachment that fits a regular buffer and can be easily removed for other screening processes allowing normal use of buffer. **BUFFER SHOULD BE RATED AT 1 1/2 HP AND 160 - 175 RPM**
- 2) Cuts 3 times or more **FASTER**. The orbital unit adds 50% more weight while the geared orbital action doubles the distance the abrasive travels increasing sanding speed while reducing scratches and swirl marks.
- 3) It can cut fast enough to practically **REMOVE CHATTER!**
- 4) **PRODUCES A GREAT FINISH!** SAND using either standard screens or sandpaper with our PSA hardplate.
- 5) **USES REGULAR SCREENS & ABRASIVES!**
- 6) You are not carrying an extra piece of equipment! You have a buffer.
- 7) Buffer handles-turns like a normal buffer! You do not have to push it around.
- 8) **ADDS DUST COLLECTION** Connects to your vacuum with a 1 1/2" hose. Sands right up to the wall! **GREAT DUST PICKUP WITH INCLUDED SKIRT**

*One orbital pad sands flatter, blends,
and smooths more evenly.*

Built in slip clutch

Excellent Dust Containment

Dust is picked up at the bottom edge of the pad through 36 holes.
1 1/2" dust pipe vacuum connection and dust skirt included.
(DUST PIPE RESTS AGAINST BUFFER HOUSING AS PART OF GEAR DRIVE)
Note: UFO will not work unless the dust pipe is used! A hole will need drilled in buffer.

**BRUSH DRIVER (MIGHTY- LOK driver) IS BOLTED TO
ATTACHMENT AND CAN BE EASILY REPLACED.
STANDARD 16" DRIVER**

ONLY HEAVY DUTY BUFFERS RECOMMENDED!

UNIQUE SANDING PATTERN
THAT IS TOTALLY DIFFERENT THAN
ANY OTHER ORBITAL STYLE SANDER

ABRASIVE TURNS AT 175 RPM WHILE
GEARED ACTION FORCES ORBITAL
MOVEMENT. CREATES A DIFFERENT
PATTERN EACH ROTATION FOR A TRUE
NONREPEATING ACTION.

SPECS

Aluminum housing 13.7" Dia 5" Tall
(with Brush Driver) 45 pounds

Uses steel gears prelubricated and
ball bearing construction

CHATTER - You need a flat abrasive surface to cut off the top of the chatter and not the hollow. The best method uses sand paper on a hard surface and that is why we have developed a hard plate adapter for PSA-sticky discs.

Blending - Blending edger and sander marks together is easier. Sometimes there is a step created when sanding. This hump can be blended together typically using an 80 grit PSA disc.

When using sandpaper with the UFO *a*lways remove center of paper!
This allows the dust to stop building up and reduces scratches.

3M 16" Hook It Sandpaper for the UFO

Plastic Hook grips directly to red, red/white, or medium maroon pad. Sands away edger marks and chatter fast. Very sharp use one grit finer. (You must cut center hole out for dust containment.)

UFO SANDING TECHNIQUE

WORKS on STAINS AND ANYTIME!
NO LOOSE SCREEN GRIT!
ONLY WORKS WITH UFO!!

Regular buffers leave scratches!

Use 5" or 6" PSA Paper
Fold the piece as shown then remove backing
Apply to white pad
USE 3 - 5 PIECES

Finish Sanding with the UFO

For the finest finish final sand with the grain and overlap next pass about 9". Sand from left to right.

For more aggressive sanding sand cross grain and keep the right side of the buffer along the wall.
